

Cross Roads ISD Bullying Prevention

In an effort to create the safest possible environment for all students, Cross Roads ISD has developed a report system available to all students in classrooms, the offices, and the counselor's office. Students who witness bullying, cyberbullying or students who are the victim of bullying may choose to report any helpful information to the campus administration through the use of the bullying intervention report form. All information may be submitted anonymously if the student chooses to do so. It is the goal of Cross Roads ISD to maintain a positive, caring environment that is free from any form of bullying and cyberbullying. Reporting of any incidents will help the campus administration and staff stay aware of potential problems and react accordingly.
